

ACTF Project Status Update September 10th 2009

Kentarou Fukuda, IBM

Agenda

- Galileo Service Release 1 (SR1) status update
- Visual Complexity Rankings and Accessibility Metrics (ViCRAM) tool status update
- Discussion on mobileOK integration
- Helios (Eclipse 3.6) release plan

Galileo Service Release 1 (SR1) status update

- **Current Status (RC3): today**
 - ◆ Bug fix
 - ◆ Performance improvement (blind usability visualization)

- **Target Date (RC4): 9/17/2009**
 - ◆ WCAG 2.0 initial support
 - ◆ Usability improvement

- **Release Date: 9/25/2009 (last Friday of September)**

RC is available at
<http://download.eclipse.org/technology/actf/0.7/maintenance/>

Visual Complexity Rankings and Accessibility Metrics (ViCRAM) tool status update

- Eleni completed major development work
- Eclipse IP review was completed
- ViCRAM is now available as standalone ACTF example tool
 - ◆ `org.eclipse.actf.examples.vicram`
 - ◆ `org.eclipse.actf.examples.vicram-feature`
- Kentarou will merge Eleni's update into CVS soon

https://bugs.eclipse.org/bugs/show_bug.cgi?id=268338

Discussion on mobileOK integration

- Unfortunately, we are having problems in using mobileOK library in ACTF
 - ◆ Some of the third party libraries included in mobileOK library were rejected by Eclipse because of IP problems
- Workarounds?
 - ◆ Add software update/install function into aDesigner
 - 3rd parties can use extension points of ACTF to develop additional functions (new check item, etc.)
 - Enable users to easily install these additional functions from 3rd party
