Here is what I did"

1) Mouse over the right edge of 1st task box
2) It will show two arrows: solid line and dash line
   And this message "click and drag to create a connection"
   a. I tried to create connection of solid line,
      it show the cursor as right, and I am not able to create connection
   b. Then I tried to create connection of dash line
      It works. However if I save it, close eclipse, then come back to the
      BPMN diagram, the created dash line connection is gone.
3) Then I tried the "flow connection" and "message connection", it show the same icon as 2a)
