

(https://www.eclipse.org/)

Eclipse Download Stats

Download requests are recorded two ways: by using the Find A Mirror script (http://wiki.eclipse.org/IT_Infrastructure_Doc#Use_the_Find_a_Mirror_script.3F), and by configuring your p2 repository (http://wiki.eclipse.org/Equinox_p2_download_stats). Direct downloads from mirrors and files linked directly to download.eclipse.org are not included here.

Search Criteria

Partial File Name:
 ?

TIP: For faster results, use a file name that matches the fewest amount of files as possible to satisfy your query. For instance, query using the core file(s) that make up one user download.

Group files

Please note: Using the filter options below causes queries to run against 914,968,815 download records, from 2017-08-20 to 2018-08-20 00:00:01. Today's downloads will be added at midnight Eastern Time.

Date ?

OR

Date From: ?

Date To: ?

TIP: date-based queries take much longer to run when files with tens of thousands of downloads are included.
