Status report - content

- Membership state
- Service delivery state 2016 / 2017
- Service planning 2017/2018
- Project planning
- openMDM[®] EWG collaboration review
 - Committees (AC, QC, SC)
 - Projects
 - Collaboration culture and communication: open, transparent and agile
- Financial issues

Membership state (1/4)

Audi

BMW

Daimler

MBBM VAS

SIEMENS

Driver Members

.. want to influence the definition and further development of Open Measured Data Management and all its deliverables. They are members of the Steering Committee and invest an essential amount of resources to sustain the WG activities.

Typical Driver members include industry users of the technologies and results provided by Open Measured Data Management WG. Most of them operate testing processes as part of their core business.

Membership state (2/4)

Bertrandt
bridgingIT ***new***
Canoo
Gigatronik
Itemis
PeakSolution

Service Provider Members

Service Provider Members view Open Measured Data Management as an important part of their corporate and product strategy and offer services for deployment, development or maintenance of Open Measured Data Management components or systems

Left / leaving the openMDM® EWG:

ATOS
NorCom
Piterion

Membership state (3/4)

HighQSoft

Application Vendor Members

.. view Open Measured Data Management as an important part of their corporate and product strategy and mainly offer products based on, or with Open Measured Data Management. Typical Application Vendor Members provide applications to the market that implement or use technologies and results provided by the Open Measured Data Management WG.

Membership state (4/4)

Tata

User Members

.. use the technologies and results provided by the Open Measured Data Management WG. They want to keep track of the Open Measured Data Management development but do not want to influence in an essential way. Most User Members operate testing processes as part of their core business.

Service delivery state 2016/2017

RQ Package RS4,RS5,RS6+x
to be released by SC

Basic Operational Readiness

RQ Package RS2,RS3
to be released by SC

openMDM@ 5 V1.0

Development Baseline, Packaging ORGA-181
3 time boxes á 42 days

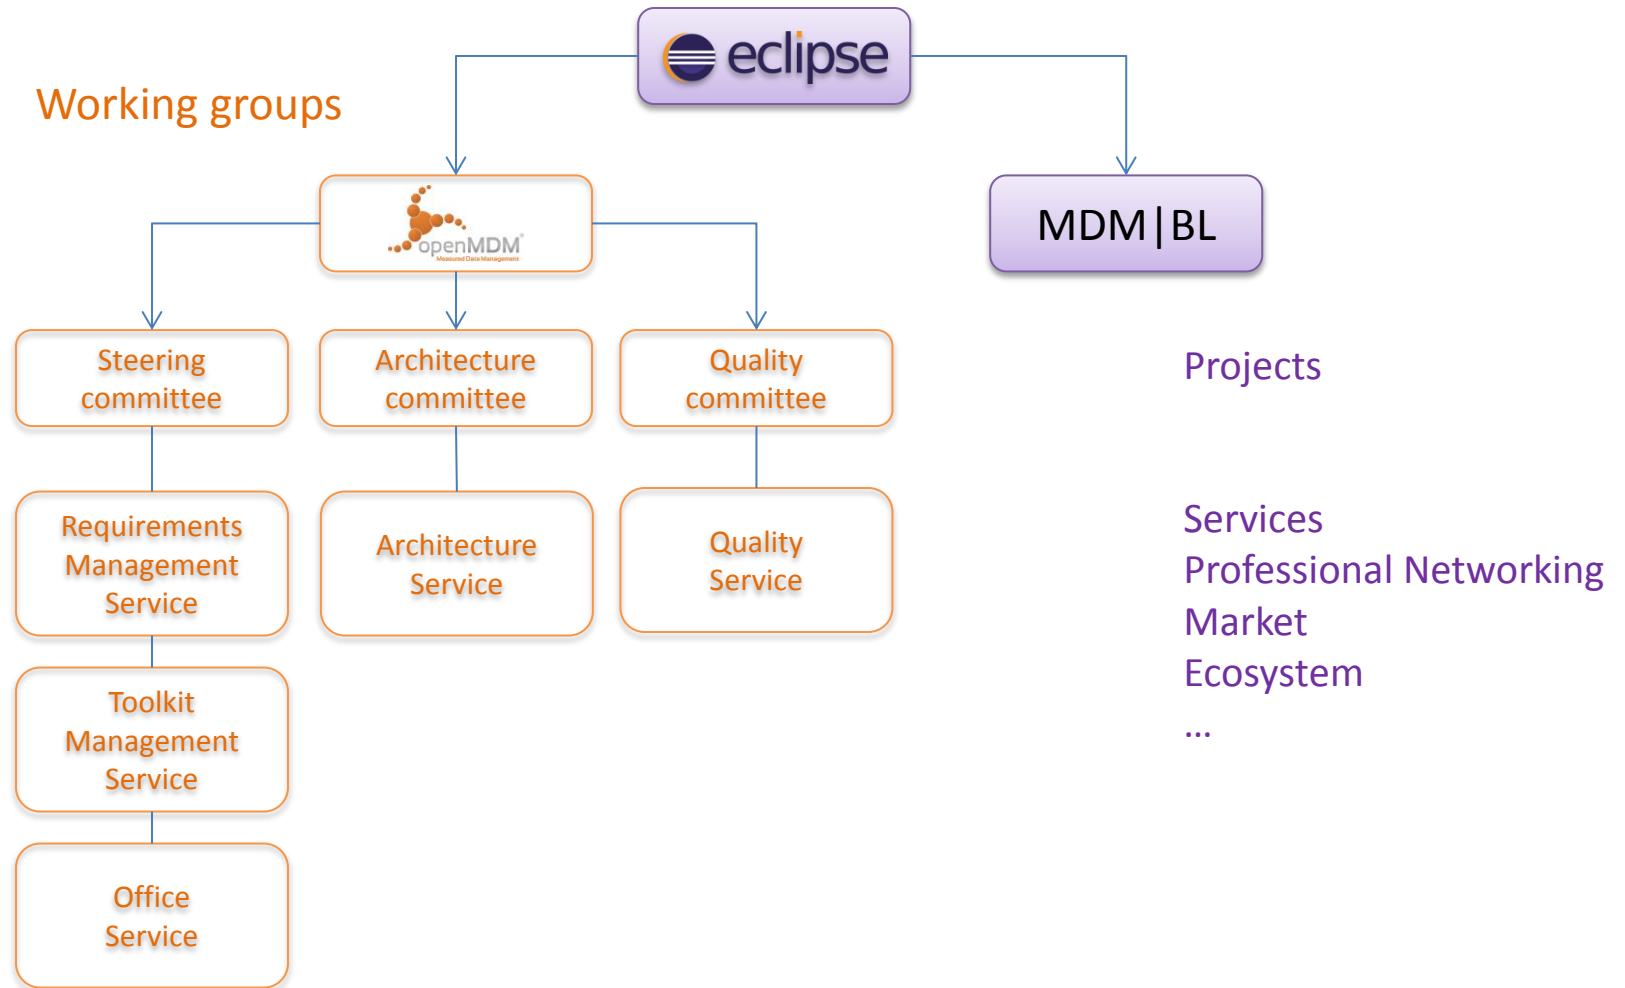

openMDM@ 5 V0.7-0.9

? openMDM@ 6 V0.x

? openMDM@ 6 V1.0

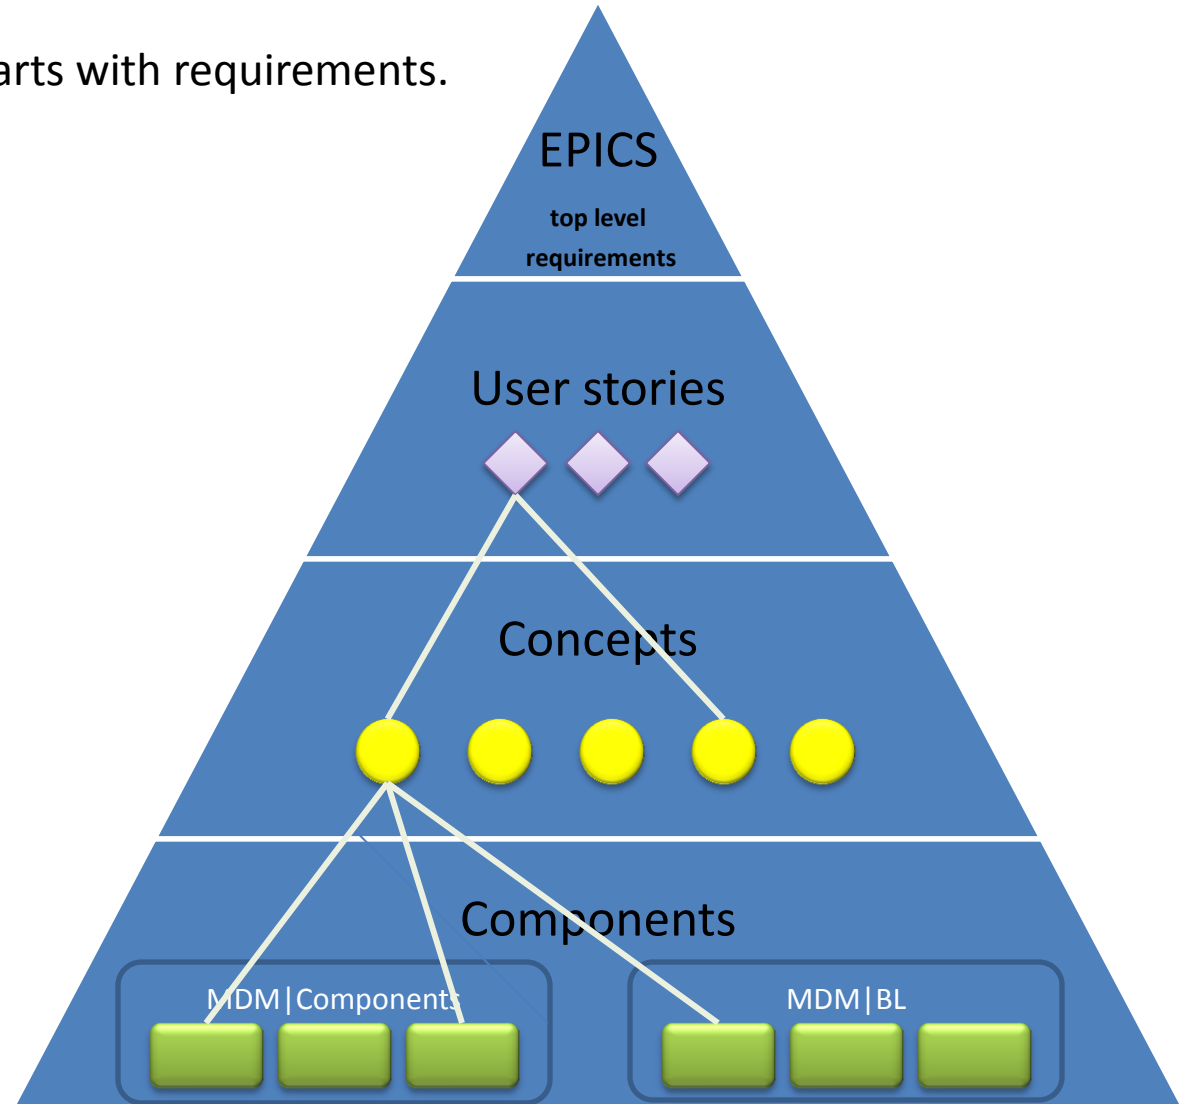

Collaboration review

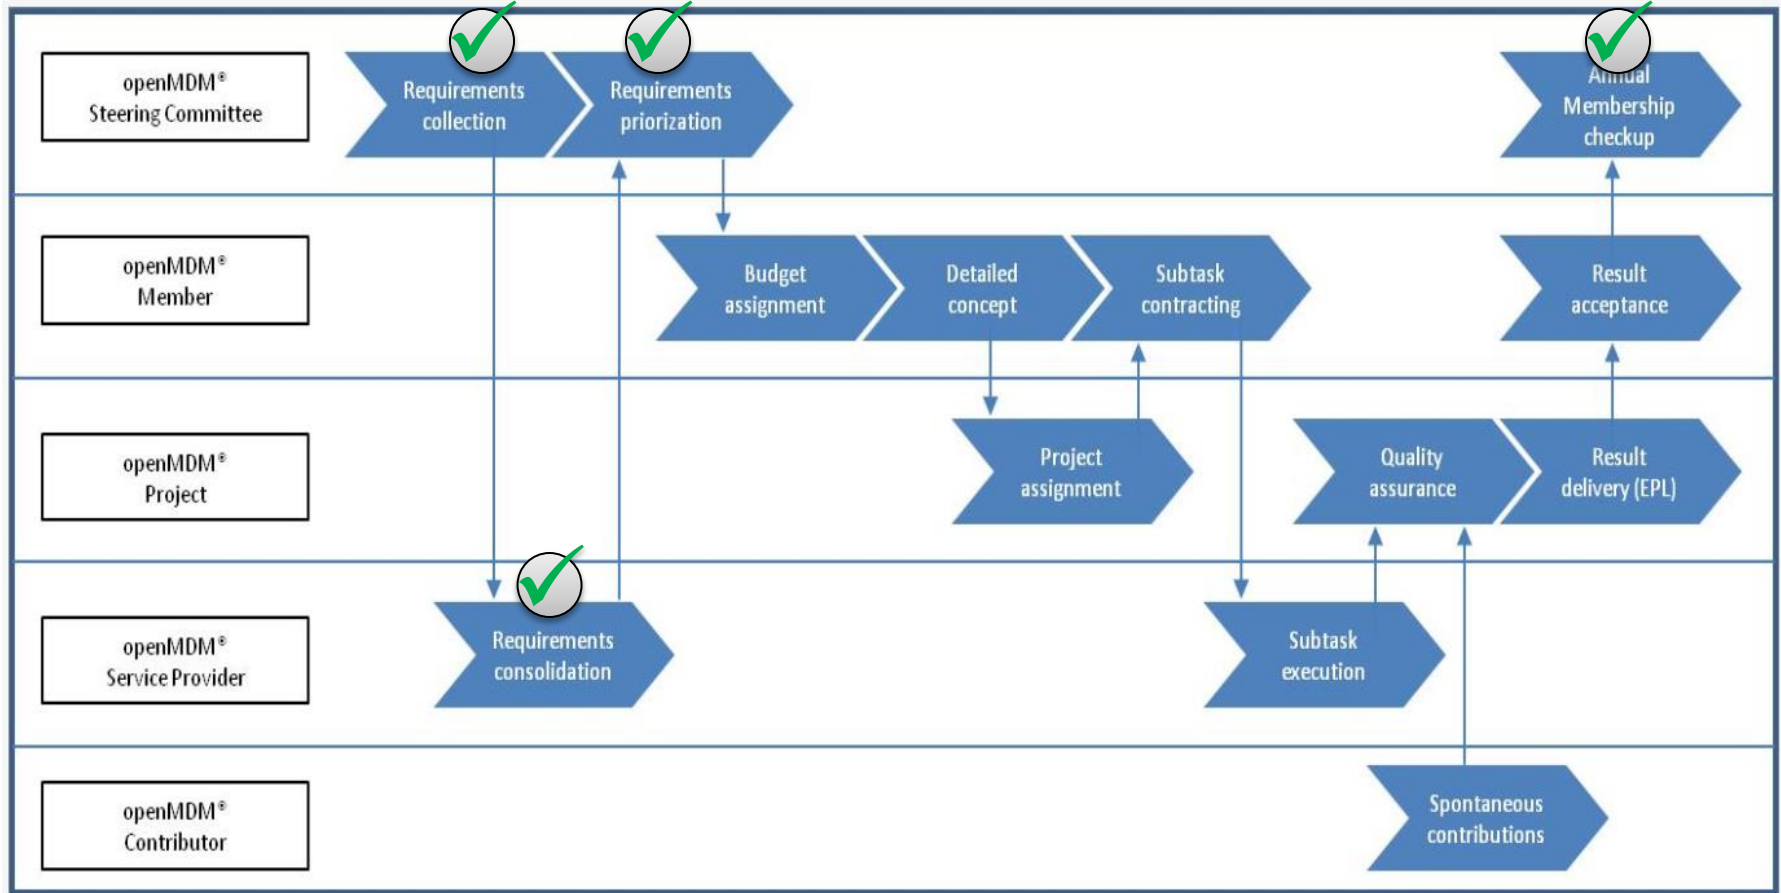

Collaboration review

Everything starts with requirements.

Collaboration review

Collaboration review: ToDos

- Define the WG quality kit and maturity process
- Establish and maintain the Open Measured Data Management integration environment
- Establish the Open Measured Data Management quality assurance service and ensure its availability to the Open Measured Data Management projects

Collaboration review: ToDos

- Continuous architecture documentation
- Architecture compliance check

Collaboration review

- Use of communication media
 - mailing lists
 - openMDM[®] issue tracking
 - agenda management
 - requirements management

Financial status

Annual funding by openMDM® EWG membership fees delivers recently:

Driver members	5	USD 40.000,-	USD 200.000,-
User members	1	USD 6.700,-	USD 6.700,-
Total			USD 206.700,- =====

Financial status

From the funding are/were deducted:

Regularly:

- Service costs web site operation (openmdm.org)

- Service costs toolkit management

- Service costs openMDM® office

By singular case 2016/2017:

- Development openMDM® 5 baseline

- Purchasing of openMDM® trademark

Accounting is managed by Eclipse and supervised by the openMDM® EWG steering committee.

Financial perspective

- The membership fees provide continuous operation of the vital functions of the EWG
- For future development activities funding concepts must be developed
