

Minutes of the Architecture Committee

Place: WebEx
Date/Time: 2015-11-20 – 11:00-11:30 CET
Minutes: Andreas Benzing, ICS AG

Participants: Andreas Benzing ICS (Daimler) (chair)
Gerwin Mathwig MDM@WEB, Daimler
Jan Wiegelmann NorCom
Stefan Wartini MBBM
Ulrich Bleicher BMW
Guests: Sibylle Peter, Alexej Stolipin

Participants are referred to by their initials, i.e. GM refers to Gerwin Mathwig.

1 Organization

The automated handling of invitations and the corresponding replies using the mailing list has proven to be highly unreliable. Therefore, only one manual invitation will be sent using the mailing list with the request to reply. The call-in details will then be provided by individual mails.

2 EclipseCon Europe

The hackathon proposed in the last SC meeting was expected to happen at EclipseCon by some attendees. However, the openMDM hackathon will be organized as a separate event. GM is currently organizing the event; the relevant information will be gathered in the Wiki.

3 Proposals

The proposal for a more concrete implementation of the architecture by BMW will be provided once it is finalized.

The responses to the proposal to use Spock for testing were unsatisfactory as there was no direct feedback on the mailing list. Although an issue [1] was filed as a reaction to the proposal, the link between the two was not added.

4 Updates

The build system discussion could not be started as the input of Gigatronik on the topic is still missing.

Similarly, the initial commit of the MDM|BL project could not be discussed as it was not available to the entire committee in time.

5 Next meeting

The preliminary date for the next AC conference call will be December 4, 2015, 11:00 CET.
